

## “Queer and Transgender Reproduction & Assisted Reproductive Technologies (ARTs)”

**Are you a LGBTQ-person (self-defining as lesbian, gay, bisexual, queer or transgender), and do you want to use or have used Assisted Reproductive Technologies (such as artificial insemination, IVF, surrogacy, etc.)?**

If your answer to this is yes, you are aged 21+, and you are able to speak and understand English, I would like to invite you to take part in this study on queer and transgender experiences with ARTs.

My name is Dr Doris Leibetseder and I am a researcher and Marie-Skłodowska-Curie Fellow at Uppsala University, Sweden, working with my faculty advisors Professor Gabriele Griffin and Dr Ulrika Dahl on this study.

### **Why take part?**

This research will contribute to articulating the experiences, rights and challenges of queer and trans people with ARTs. The final aim is guidelines for queer- and trans-inclusive European ART-regulations.

If you agree to participate in this research, you can fill in the online-survey (approx. 30 min), which will involve questions about your experiences and challenges with ARTs and your suggestions for improvement. Here is the link to the survey:
